

# Work Station Cards

Each card comes with a black outline and red outline. I have done this so the students could tell the difference between Station Rotations (I do two rotations). Black outline is the first rotation and the red outline is the second rotation.

Most of the images on the following cards come from Phillip Martin (<http://www.phillipmartin.info/clipart/homepage.htm>). A few of the images I downloaded from a Google Search to represent a product.

I printed these cards on white card stock and had them laminated. They fit perfect into a pocket chart. If the font does not appear correctly, the font is Disney Print which can be downloaded from the Internet and placed in your font folder. I found this font by doing a Google search.

Please use these cards for classroom use only. Please do not link directly to this PDF. You may link directly to the Teacher's Lounge. I appreciate your help in this matter.
